

SECTION TWO: Antarctic Specially Protected Areas

With the Antarctic Science, Tourism, and Conservation Act of 1996, the new system for designating Antarctic protected areas, set out in Annex V of the Protocol on Environmental Protection, was implemented into U.S. law. As Annex V had not gone into effect as of July 2001, and as the old classification system (Specially Protected Areas and Sites of Special Scientific Interest) is still familiar to many in the United States Antarctic Program, the Antarctic Specially Protected Areas are listed in this section followed by their old designation in parenthesis. Please note that the management plans are reproduced here exactly as they were adopted under the Treaty System, and vary in format and content relating to the year in which they were adopted.
