---

*This site fulfills the annual obligation of the United States of America as an Antarctic Treaty signatory to report its activities taking place in Antarctica. This portion, Modifications to Plans 2002-2003, supplements Planned Activities for July 2002 through June 2003 published elsewhere on this site.*

## **Introduction**

Organization and content of this site respond to articles III(1) and VII(5) of the Antarctic Treaty. Format is as prescribed in the Annex to Antarctic Treaty Recommendation VIII-6, as amended by Recommendation XIII-3.

The National Science Foundation, an agency of the U.S. Government, manages and funds the United States Antarctic Program. This program comprises almost the totality of publicly supported U.S. antarctic activities—performed mainly by scientists (often in collaboration with scientists from other Antarctic Treaty nations) based at U.S. universities and other Federal agencies; operations performed by firms under contract to the Foundation; and military logistics by units of the Department of Defense.

Activities such as tourism sponsored by private U.S. groups or individuals are included. In the past, some private U.S. groups have arranged their activities with groups in another Treaty nation; to the extent that these activities are known to NSF, they are included. Visits to U.S. Antarctic stations by non-governmental groups are described in Section XVI.

This document is intended primarily for use as a Web-based file, but can be printed using the PDF option. Its internal cross links and links to other sites present more information than in the print publications of past years. These links also are intended to facilitate easy use of the site.

# I. Ships and Aircraft

---

*Section I of the Modifications of Activities Planned for 2002-2003  
lists any changes to ship and aircraft usage planned for this time  
period.*

## **Ships**

The US Coast Guard Icebreaker *Healy* arrived at the ice edge near McMurdo on February 05 to assist the *Polar Sea* with cutting and clearing the channel due to extremely heavy ice conditions in the Ross Island area. The Resupply Vessel *American Tern* made its first trip to McMurdo, arriving at the ice edge on February 01, and was not able to dock pier-side until February 10, due to heavy packed ice in the channel. The MSC Tanker arrived ice edge February 10 and never made it to the McMurdo pier. The discharge of fuel was conducted from the ice edge which started on February 24 and completed March 07.

## **Aircraft**

During Winfly (August) the USAP used 4 C-141 and 2 C-17 missions to move people and cargo between Christchurch and McMurdo. The USAF C-141 completed 22 missions between Christchurch and McMurdo during October and November. The same group came back to complete 19 C-141 missions during January and February. A USAF C-17 aircraft ran (4) turnaround missions in October to transport outsize cargo. The Royal New Zealand Air Force completed 14 missions between Christchurch and McMurdo and then returned in March (with 1 mission) to pull out personnel who remained passed the normal season period to complete the refueling operations.
