MAKE YOUR OWN  
BOOKMARKS

## 1. PRINT

Load paper into printer and print one or all the pages single-sided.

## 2. FOLD

Fold along the center line to create two-sided bookmark.

## 3. GLUE

Adhere the back of bookmark with a glue stick or double-sided tape.

## 4. CUT

Cut along dotted lines to separate the bookmark from the page.

FOLD

### MISFIT PENGUINS OF ANTARCTICA

#### FACTS ABOUT ADÉLIE PENGUINS

Adélie penguins were discovered in 1840 by scientists on the French Antarctic expedition led by explorer Jules Dumont d'Urville.

Adélie penguins are one of five species of penguins that live in Antarctica.

A colony of Adélie penguins was found on the Danger Islands in 2018 and is thought to be home to about 1.5 million individuals.

The 'misfit' penguins may have different colorings but are just as successful finding a mate as standard-colored Adélie penguins.
