Request for Resource Allocation draft (cont'd)

Capture resource specifics.

A Request for Resources would address the following

Initial Questions	YES	NO
Is the request consistent with your Division/Office and the BFA Human Capital Plans?		
Is workspace currently available to accommodate new staff?		
Are there resources already performing the proposed function in another division? If so, is there sufficient rationale provided for running functions in parallel? <i>If not, it may make sense to augment resources in their current division instead.</i>		
Are the resources for the proposed function more appropriately placed in another division?		
Does the request for resources seem to make sense in terms of efficiency?		
Will the resources enhance customer service?		
Will the resources make sense to our stakeholders?		
Will the resources enhance NSF's government-wide leadership?		
Does the request strengthen BFA in terms of succession planning?		
Does it provide this strength in the highest priority areas?		
Will the proposed resource or proposed upgrade to existing resources affect other divisions – <i>that is, do other divisions have comparable positions that should also be considered for upgrade.</i>
