

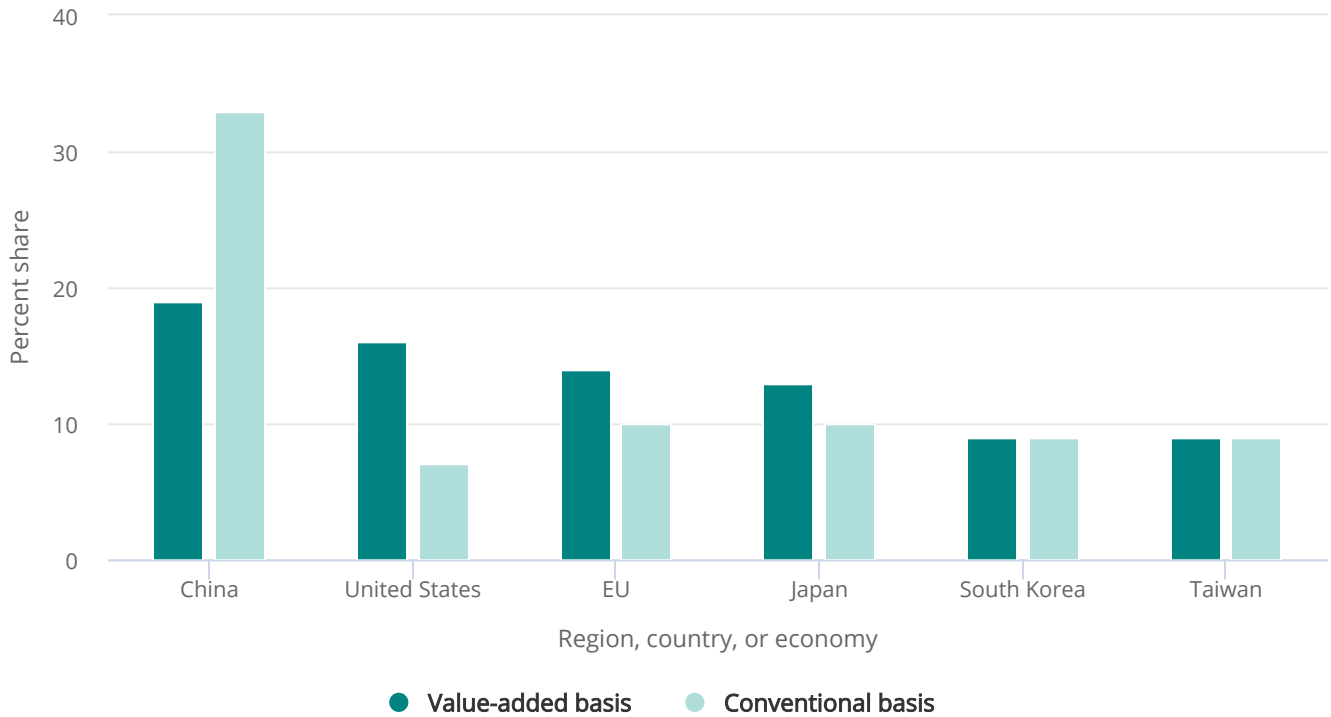

FIGURE 6-E

Exports of computer, electrical, and optical equipment, by selected region, country, or economy on conventional and value-added basis: 2011

EU = European Union.

**Note(s)**

Exports measured on a conventional basis are based on customs data and include intermediate inputs and components imported from other countries. Exports measured on a value-added basis estimate the value added of inputs and components originating from the region, country, or economy and exclude intermediate inputs and components imported from other countries. The EU includes the current 28 member countries. EU exports exclude exports among EU member countries. China includes Hong Kong. China's exports exclude exports between China and Hong Kong. U.S. exports exclude exports to Canada and Mexico.
